

BKL 200 ICE

Features

- ◆ Heavy-duty stainless steel construction.
- ◆ Chills up to 50 gallons of water per hour.
- ◆ Consistently delivers temperatures 33°F - 34°F.
- ◆ Dispenses 3-5 gallons/minute
- ◆ UL Listed NASA 2651 - CE approved
- ◆ Small enough to be wall mounted saving floor space.
- ◆ Can hook directly to your water meter.

Specifications

Capacity	50 gallons/hour
Water Pressure	15-100 psi
Max Test Pressure	225 psi
Water Inlet Diameter	R 1/2"
Temperature	33-34 °F
Water Outlet Pressure	15-100psi
Electrical Requirements	110 VAC (+/- 10%) 60 Hz (+/- 2 Hz) Single Phase
Power	10 Amps / 1 Kw
Net Weight	127 Lbs
Dimensions	20" x 35" x 21"

(Specifications are subject to revision and confirmation)

The Water Chilling System for a New Age

The BLK 200 ICE is the revolutionary little unit with the power to produce a large quantity of chilled water. It's secret is in the ice it produces as a storage buffer for periods when chilled water is needed. This buffer helps maintain a consistent temperature range and allows for immediate water delivery. The BLK 200 ICE also extremely hygienic boasting a contained circulation system that keeps the water from touching the open air, and potential contaminants. Furthermore, the unit utilizes existing water pressure so no pumps are necessary - making the BLK 200 ICE a simple, reliable water chilling solution.
